

TRANSPREAD 'Manure Spreading'

Spreading up to 30,000 tonnes of manure a year per machine.

Hydraulic or ground drive feed system.

1000 wide chain has two independent chains which increases strength and reduces maintenance, If damage occurs only the one needs replacing.

Can be spread with 730 wide chain or 1000 wide if material is very lumpy.

1000 Wide Bin Sizes

- 5.3 cu 2.4 long
- 6.6 cu 3.0 long
- 8.0 cu 3.6 long
- 8.5 cu 3.0 long
- 10.0 cu 3.6 long
- 12.0 cu 4.2 long

Special manure spinners combine to give even spread and suffer minimal damage from stones etc. picked up when loading
